Mackintosh Ceramic Coating

A Ceramic Coating Is A Liquid Polymer That Is Applied By Hand To The Exterior Of A Vehicle. The Coating Chemically Bonds With The Vehicle's Factory Paint, Creating A Layer Of Protection. A Ceramic Coating Is Not A Substitute For Paint Protection Film, Which Provides A More Comprehensive For Protection. Rather, It Is A Premium Wax Alternative.? A Ceramic Coating Creates A Permanent Or Semi-permanent Bond With A Vehicle's Paint, Meaning That It Does Not Wash Away Or Break Down And Does Not Require Repeated Application Every Few Months. Advantages Of Nano Ceramic Coating

Mackintosh Premium Polish

Its An Ultimate Detailing Product Which Is Derived By Mojo Autocafe R&d Department That Is Based On Sealent Paint Protection Method Which Will Last For 12 Months With High Glossiness. In The Garage We Also Call It As Budget Friendly Ceramic Coating.

Advantages

1. Multilayer Process
2. Deep Level Exterior Detailing
3. Whole Glass Treatments
4. Sealent Based Protection
